

Well proven, simple and almost indestructible: The "W 401" waste/multi oil heater from Kroll

Kroll[®]
Heating and Ventilating

Experience gained over many decades makes the Kroll waste/multi oil heater reliable, cost effective and an environmentally friendly heating product.

In times of rising fuel costs, the pay back period for a Kroll waste/multi oil heater is very short. Utilizing your waste oil, you get an effective warm air heater with no fuel costs, and no fees to pay for the collection and disposal of your waste oil.

The Kroll W 401 and W 401-VL are particular suitable for heating car work-shops and garages, warehouses, etc.

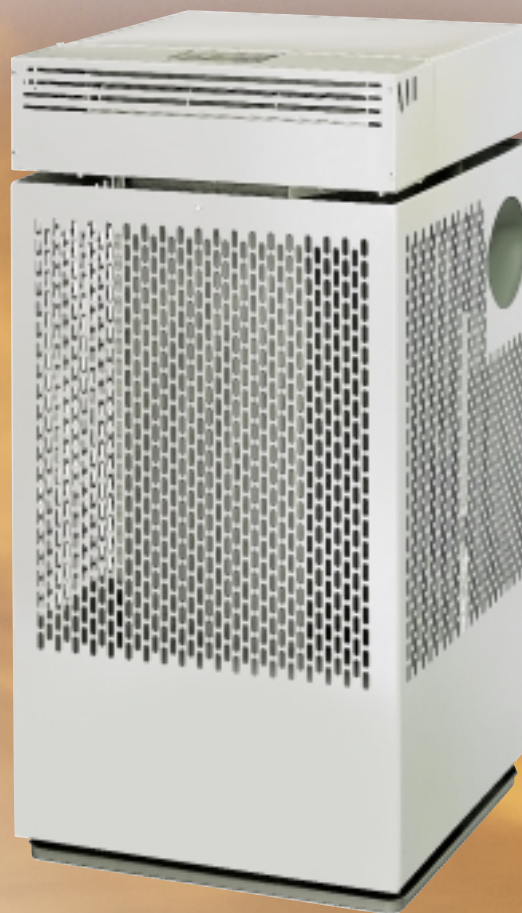

The Units are easy to install and immediately ready for use.

The units feature –

- Internal vaporising burner
- High/Low manual heat regulation
- Flame failure security thermostat
- Overflow security switch
- Self contained oil tank
- Manual Ignition
- Durable and safe powder coated casing

Type W 401: Natural draught heater

Type W 401-VL: Heater complete with high performance fan. The quiet running, high performance fan enables a quicker and more extensive warm air distribution.

Technical data and dimensions		W 401	W 401-VL			W 401	W 401-VL
Heat Input	kW	35	35	Electrical connection	V/A	230~/0,1	230~/0,4
Heat output	kW	29	29	Content of tank	litre	24	24
Air rate	m ³ /h	–	580	Diameter of chimney	mm	150	150
Nominal air rate	m ³ /h	–	460	Width	mm	600	600
Temperature increase (Δt)	Kelvin	80	80	Depth	mm	770	770
Oil consumption	kg/h	2,9	2,9	Height	mm	1000	1170
Electrical consumption	kW	0,03	0,09	Weight	kg	71	85

Professionals heat with Kroll.
