

Our range for heating, ventilation, air-condition and dehumidification

Mobile warm air heaters
Convenient units which operate smoothly.
Rated heating power 27 to 144 kW

Oil-fired space heaters, without flue
For use in well ventilated rooms or in the open air. 100 % of the energy is converted into heat. Rated heating power 25 to 80 kW

Oil-fired space heaters, with flue
For use in closed rooms. Rated heating power 25 to 75 kW

Infra-red oil heaters IR 33
Radiant heat without dust.
Rated heating power 33 kW

Gas-fired heaters
For instant and efficient heat. Also available in stainless steel.
Rated heating power 10 to 142 kW

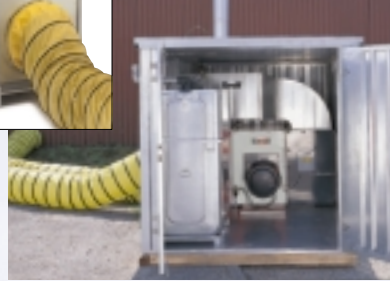

Electric fan heaters
For small and medium-sized rooms, also as additional heating source. Rated heating power 3 to 18 kW

Mobile heating plants HM 200
The solid heating plant for building sites, tents, halls. Rated heating power 173 kW

Mobile heating plants HCL
The complete heating for halls.
Rated heating power 230 to 440 kW

Dehumidifiers
For efficient drying and keeping dry.
Extraction 20 l to 120 l/24 h

Room dryers T 16
For mobile drying. Extraction 16 l/24 h

Mobile air conditioners
Instantly ready for operation.
Cooling power 3 to 4,7 kW

Stationary air conditioners
For installation at ceiling and wall, also for several rooms.
Cooling power 2 to 7 kW

Stationary warm air heaters
Powerful gadget for halls of all kinds of sizes. Rated heating power 20 to 652 kW

Stationary warm water and air heaters
For the generation of warm air for direct heating and/or warm water that can be used for heating systems.
Rated heating power 30 to 80 kW

Stationary warm air heaters SL
Completely equipped for immediate heating. Rated heating power 35 to 69 kW

Wall-mounted warm air heaters
For workshops and storerooms, very space-saving.
Rated heating power 22 to 69 kW

Atmospheric warm air heaters
For the heating of halls, efficiency over 90 %.
Rated heating power 24 to 75 kW

Gas-fired heaters
To be installed on the ceiling: highly suitable for horticulture because of carbon dioxide.
Rated heating power 60 to 100 kW

Air heaters
Highly suitable to complete existing central heatings. For installation at ceiling and wall. Rated heating power 6 to 100 kW

Warm air heaters for agricultural use
Made of stainless steel, for natural and liquid gas.
Rated heating power 8 to 50 kW

Multi fuel oil burners
For vegetable, animal and conventional oil.
Rated heating power (depends on fuel) 28 to 195 kW
